

Hettich Quadro –

The quiet solution

High on durability:

Steel balls never lose their perfectly round shape even when they're on the move and under pressure. Depending on the Quadro version, up to 180 precision balls made of chrome-hardened steel guarantee the incredibly smooth sliding action

Tracking stability:

The special profiles and precision steel balls work in perfect harmony

Self-cleaning:

The system is self-cleaning. Any dirt is simply swept aside by the steel balls as they traverse along the track

Silent System:

Silent System is the innovative damping system for drawers. It puts the brakes on for a slow-motion stop

EZ^QSTAL: Framed Cabinet Side Mount System

Holiday Kitchens mounts the drawer guide into plywood cabinet sides utilizing the Easy Install System, which is cleaner, more durable, and is installation friendly. It consists of an angled steel bracket with a connector pin. The weight of the drawer and contents is distributed on the entire cabinet side.

EZ^QSTAL: Sets Holiday apart from its competition
